AIRZONE comes with CoolOver cover as standard

AIRZONE® QUOTES

“
It's as if somebody designed it just for me

The only cushion that ticks all the boxes

”

Robert

Struggled to manage his pressure care due to his weight and need to transfer frequently throughout the day.

Robert has limited use of his legs due to a complex a genetic condition and suffers from an under-active thyroid causing problems with his weight.

He maintains a full-time job as an accountant which demands frequent changes in his seating during his working day.

He recently started using the **AIRZONE®** with a high weight limit. It promotes cooling through good air circulation and its low profile eases transfers.
