HH EQUAZONE™ Premium

- EQUAZONE premium offers unprecedented pressure reduction to the highest level with the inclusion of temperature regulation.
- The cushion comes pre-set which means you'll never need a pump and the quadrants will always remain inflated to assist the user's stability as well as pressure.
- The ischial cut outs give any user an extremely comfortable surface and the confidence that their bony prominences will always be immersed in air.

Code	Cushion	Risk	Weight limit	Dimensions	Cover

Female Stroke Patient North Midlands 66 years old 24 stone

This client has used over ten cushions in the last few years since her stroke, between the Wheelchair Therapist and District Nursing Team they have been unable to find a solution that she finds comfortable as well as reducing the increased pressure on her right side due to her lean.

Several trials were carried out over a weekly basis on a gel cushion, static air cushion and the EQUAZONE. All cushions pressure mapped ok for the lady but the EQUAZONE managed to significantly reduce the pressure under the lady's right IT as well as provide

her with the comfort she hadn't felt for a few years. She is now happily using the EQUAZONE on her wheelchair and armchair at home every day, there are no longer any signs of redness on her skin but most of all she is no longer in pain when sitting.
