

# HH LOWZONE<sup>®</sup> 2

Category - High Max Weight - 25 Stone / 158kg

LOWZONE<sup>®</sup> 2 delivers unprecedented levels of postural support, thermo regulation and client comfort.

THERMO  
REGULATION  
GEL CELL

Also available as a flat cushion

- Enhanced ergonomic shaping helps to promote a neutral pelvic position - improving lower spine stability and reduce tendency to adopt a slumped posture
- Tailored to allow the client to carry weight on key areas (fleshy parts) - where best able to accommodate and away from vulnerable high risk areas (IT, Coccyx)
- Extended fluid gel insert reduces potential shear - achieving better conformity and stability than any conventional foam
- Patented thermo regulation gel cell - actively regulates users skin temperature to prevent excess sweating and sophisticated fabrics promote good air flow to further reduce heat and moisture build up
- Paediatric to adult - range of sizes available

Helping Hand  
Pressure Care

HH a division of The Helping Hand Company

# HH LOWZONE<sup>®</sup> GEL 2

Category - High Max Weight - 25 Stone / 158kg

Absorbing and releasing heat as needed, the **LOWZONE<sup>®</sup> GEL 2** actively manages a client's microclimate - all day, every day

Therma-Gel insert regulates and maintains user temperature at an ideal 32°C

Variety of covers including moisture wicking fabric that promotes airflow and reduces humidity

## Client's testimonial - Shropshire

A tetraplegic client was extremely unstable and struggling with stabilising his position and posture. An improved position was maintained using a Lowzone Gel 2 Contour but still had to manage his pressure reduction as he moved from Air to Gel. This is where the iQ sensing came in, programming it every three hours. The client's pressure was relieved - by leaning his full body weight over a table and his wife assisted him back - so with the full concept he managed pressure reduction and improved his posture dramatically.

| Product   | Description  | Max weight       | Sizes available   | Covers available     |
|---|--|------------------|---|----------------------|
|  | Integrating unsurpassed pressure management, progressive postural control and microclimate regulation. | 25 stone (158kg) | length 12-24" (30-61cm)<br>width 10-24" (25-61cm)<br>depth 2, 3 & 4" (5, 8, 10cm) | Wipe-down and spacer |
