

Adaptive seating solution for the management and prevention of pressure sore development

*“ The Posturite System has enabled Margaret
to sit in comfort, fully supported, allowing her to
maintain her independence (with local support). ”*

Katrine, Occupational Therapist, Southern England

- A range of ergonomic cushions and backs; easy to custom fit in to a wide range of seating including riser recliners, wheelchairs and even the beloved family chair
- Accommodate all risk levels of pressure management and clients' existing seating provision by supporting the upper body to help internal organs and muscles to function, such as swallowing, breathing, healthy digestion
- Ideal early intervention support or interim prescription whilst waiting for more complex seating and available in any size, with specific adaptations for Paediatric
- Option to integrate active thermo regulation with the Gel2 cushion or CoolOver cover
- All Posturite seating includes straps, storage bag and removable wash covers

The Posturite modular system suits individual requirements by supporting home reablement, long term care and helps maintain independence.

Lateral

Compact design minimises impact on seat depth, maximising the seated area for optimum weight distribution

Functional

Positive back support to promote good posture & positioning, facilitating independence and everyday activities

Full Height

Designed for maximum freedom of movement, whilst providing a more functional seating posture
